ABOUT OUR COMPANY

Svivatec Ltd. has been operating for over five years and is led by Hoshea Schaechterle, who has gained almost 20 years of experience and expertise in the Israeli recycling market.

The company provides a wide range of advanced services in the field of recycling – from the initial procurement of recycling equipment for organic waste from factories, private companies, transfer stations, and composting sites – to their ongoing maintenance and comprehensive repair services, all while complying with legal requirements and the standards of the Ministry of Environmental Protection.

The guiding principle of the company is to provide maximum service to its clients, promote sustainability, and commit to the most efficient and cost-effective solutions.

The company's vision is to expand its already widespread national services and turn Israel's recycling infrastructure into an effective and leading model in the field of a green and healthy environment, through advanced technologies that ensure maximum customer satisfaction.

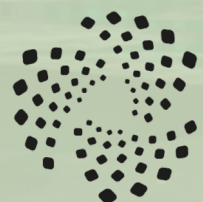

OUR SERVICES

▶ IMPORT OF RECYCLING EQUIPMENT

The company imports recycling equipment manufactured in Austria, Germany, and Italy, from some of the world's leading companies:

Komptech, Günter-Anlagenbau, EmiControls, Zijtveld, Wert, Wolf.

The import process starts with the customized selection of equipment to meet the specific recycling needs of the client and continues through installation and maintenance.

EmiControls

ZIJTVELD

GÜNTHER

WOLF

TECHNIK FÜR BAUMASCHINEN

▶ ONGOING MAINTENANCE

The company provides routine maintenance services for recycling equipment to clients who operate various recycling systems, including: Dust treatment systems, waste separation units, shredders, crushing accessories, and heavy-duty machinery.

Our maintenance service emphasizes ongoing care according to manufacturer requirements (both local and international), early detection of problems and malfunctions, and is delivered with a strong customer service mindset.

MALFUNCTION REPAIR

Handling of equipment malfunctions that arise from time to time, including the provision of spare parts and customized solutions.

CONSULTING FOR FACTORIES

Consulting services for factories in all aspects of recycling: economic and cost-efficiency analysis, regulatory compliance, guidance on compost creation, customization of recycling systems, infrastructure adaptation, and operational/ maintenance methods.

Consulting is provided by top industry professionals with extensive experience in establishing recycling infrastructure for factories and companies.

ADVANTAGES

► CUSTOMIZED SOLUTIONS

Extensive knowledge and experience in the recycling field allow for tailored technological solutions that match the client's specific needs and infrastructure, in the most accurate and cost-efficient manner, using a wide range of leading innovative elements.

► OUTSTANDING SERVICE

Customer satisfaction is one of the company's core values, making it both in-demand and trusted. Each client receives personal attention from professional staff fluent in multiple languages and available at high responsiveness.

► RELIABILITY

The company is committed to meeting deadlines and providing the best and most cost-effective solutions for its clients.

END-TO-END SERVICE

Svivatec offers full service — from initial consulting before purchase, through the actual procurement stage, and into the ongoing maintenance of the equipment — providing clients with a complete package under one professional roof.

SPECIALIZED EXPERTISE

Company staff undergo advanced training courses at international recycling equipment manufacturers, ensuring clients receive the most accurate and up-to-date professional knowledge.

REGULATORY RECOGNITION

The company maintains connections with various government ministries, including the Ministry of Labor, the Ministry of Environmental Protection, and the Ministry of Agriculture. It also plays a role in influencing the regulatory protocols of the recycling sector.

Ltd., Dan Cities Association, Express Green Ltd., Readymix-Shtang Recycle Israel Ltd., Sharon-Dan Investments Ltd., and more.

TESTIMONIALS

“ Greetings,

Following many years of collaboration with a representative from the company Svivatec, I would like to recommend working with them. The technician we worked with was professional, responsible, and highly knowledgeable in the field of recycling. During our partnership, I, as a representative of the company Zvi Cohen Ecology Ltd., had the opportunity to purchase a significant amount of equipment through their representative, who represented European companies. The careful planning before each purchase, adherence to delivery timelines, and all associated logistics were executed flawlessly. This included the acquisition of shredders and the setup of recycling plants and waste treatment facilities from start to finish, including training and ongoing service. I am available for any questions regarding this matter.

Sincerely,

Moti Silam, VP of Business Development, Zvi Cohen Ecology Ltd.
